

1. Why lose it's colour  
Cause reduced  
sunlight

Red colour caused of  
glucose change into  
red colour

Dark green of leaves  
caused of  
Very healthy tree

Deep green is older  
Light green is younger  
Cause mobility  
Material can't transfer  
from dark to light

Grey colour cause fungi  
live on it as parasite  
The plant is unhealthy

Red colour cause firstly  
another colour  
(xanthophyll) is formed  
Then chlorophyll is forming  
It's naturally  
The plant is healthy

Yellow colour cause of reduced phosphate
